

KB 228

Shine & Wet Look (Econo)

KB 228 is a special water based polymer with silicone specially designed to protect and keep a shine & wet look on vinyl, rubber, plastic and leather or other such surface materials.

KB 228 is very efficient and economic to protect surfaces from fading and cracking by reducing ultraviolet light, while bringing out color, restoring luster and shine, protects against abrasion. Eliminates static electricity to reduce dirt attraction. If less shine is desired, lightly buff with damp cloth.

Application

Apply KB 228 with a clean cloth or sponge (or spray) with a cleaning action. Spread evenly, allow to penetrate and chemically bond for a few minutes then remove excess for a beautiful protective shine. On some surfaces a two coat application provides best results. Apply as needed to maintain shine and protective coating.

Dosage

Use undiluted product.

Handling & Precaution

This product may caused slipperiness on certain surfaces until it is completely dry. May caused smearing on glass or other transparent services. Avoid spills on eyes. Should avoid prolonged unnecessary contact with skin. May irritate when exposed for a longer period on certain sensitive skin. Harmful if swallowed. Keep away from children. Keep container capped in a cool dry place

Packaging

Available in pail of 20 lt.. Can also be custom packaged.
